## **Madison County Utility District Begins the Implementation of GIS Using SDI maps.**

**LOUISVILLE**, Ky., July 19, 2011 - Madison County Utility District, located in Richmond, Kentucky has purchased GIS software from Spatial Data Integrations, Inc. (SDI) to begin implementation of a GIS program at the utility. The software, SDI maps, is a mapping software specifically designed for, and tailored to, the utility industry. SDI will also provide training services and basemap data to assist with the GIS implementation.

SDI maps is specifically designed for the utility industry and is intended to give the power of GIS to users with all levels of computer experience. The software enables users to better manage infrastructure assets and create an accurate, up-to-date system map without having to know GIS theory or database design and administration. SDI maps is an extension of ArcGIS software, a product of GIS industry leader, ESRI.

Founded in 1994, SDI is a full service, ISO 9001:2008 compliant, geospatial services firm that provides a wide variety of geospatial solutions, including; database design and maintenance, systems and data integration, military intelligence and homeland security, emergency management and response, and application development to government, utilities and the private sector. With offices in Louisville, Kentucky, Grayson, Kentucky, and Greenwood, Indiana, SDI specializes in providing high quality digital mapping and geospatial services to government, utilities and private sector businesses.
